

#IUSMIGRANDI VS #MOSMAIORUM

From 13th to 26th of October an European police operation led by Italian government called "Mos Maiorum" will take place all over European Union. 118.000 police forces will be monitoring and checking the migration routes chasing people without papers and visas. Increased police controls are expected in bus and train stations, airports, highways and inner European borders.

Pay attention to it and remember that:

- you can always ask for international protection (political asylum): it is enough to tell or write in a paper your "expression of will"
- if you have already applied for international protection in another European country you can apply again in a different country explaining that in the first country where you applied your rights were partially or totally violated
- if you have relatives in Europe inform immediately local authorities
- if you have one or more relatives who are EU citizens you can't be deported out of Europe
- if you are in trouble or if you need support contact immediately a lawyer or a local association
